III. Capital Adequacy

- a. Bank maintains capital to cushion the risk of loss in value of exposure, businesses etc. so as to protect the depositors, general creditors and stake holders against any unforeseen losses. Bank has a well defined Internal Capital Adequacy Assessment Process (ICAAP) policy to comprehensively evaluate and document all risks and to provide appropriate capital so as to evolve a fully integrated risk/ capital model for both regulatory and economic capital.

In line with the guidelines of the Reserve Bank of India, the Bank has adopted Standardised Approach for Credit Risk, Basic Indicator Approach for Operational Risk and Standardized Duration Approach for Market Risk for computing CRAR.

The capital requirement is affected by the economic environment, regulatory requirement and by the risk arising from bank's activities. The purpose of capital planning of the bank is to ensure the adequacy of capital at the times of changing economic conditions, even at the times of economic recession. In capital planning process the bank reviews:

- o Current capital requirement of the bank
- o The targeted and sustainable capital in terms of business strategy, policy and risk appetite.
- o The future capital planning is done on a three-year outlook.

The capital plan is revised on an annual basis. The policy of the bank is to maintain capital as prescribed in the ICAAP Policy (minimum 12% Capital Adequacy Ratio or as decided by the Bank from time to time). At the same time, Bank has a policy to maintain capital to take care of the future growth in business so that the minimum capital required is maintained on continuous basis. On the basis of the estimation bank raises capital in Tier-1 or Tier-2 with due approval of its Board of Directors. The Capital Adequacy position of the bank is reviewed by the Board of the Bank on quarterly basis and the same is submitted to RBI also.

IV. General disclosures in respect of Credit Risk

a. The policy of the bank for classifying bank's loan assets is as under:

NON PERFORMING ASSETS (NPA): A non performing asset (NPA) is a loan or an advance where:

- I. Interest and/ or installment of principal remain overdue for a period of more than 90 days in respect of a term loan,
- II. The account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC),
- III. The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,
- IV. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops,
- V. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.

An OD/CC account is treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for more than 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the

date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts are treated as '**out of order**'.

Any amount due to the bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the bank.

Non Performing Investments (NPI):

In respect of securities, where interest/principal is in arrears, the Bank does not reckon income on the securities and makes appropriate provisions for the depreciation in the value of the investment.

A non-performing investment (NPI), similar to a non-performing advance (NPA), is one where:

- (i) Interest/ installment (including maturity proceeds) is due and remains unpaid for more than 90 days.
- (ii) This applies mutatis-mutandis to preference shares where the fixed dividend is not paid.
- (iii) In the case of equity shares, in the event the investment in the shares of any company is valued at Re.1 per company on account of the non-availability of the latest balance sheet in accordance with the Reserve Bank of India instructions, those equity shares are also reckoned as NPI.
- (iv) If any credit facility availed by the issuer is NPA in the books of the bank, investment in any of the securities issued by the same issuer is treated as NPI and vice versa.
- (v) The investments in debentures / bonds which are deemed to be in the nature of advance are subjected to NPI norms as applicable to investments.

Non Performing Assets of the Bank are further classified in to three categories as under:

► Sub standard Assets

A sub standard asset is one which has remained NPA for a period less than or equal to 12 months.

► Doubtful Assets

An asset would be classified as doubtful if it has remained in the sub standard category for 12 months.

► Loss Assets

A loss asset is one where loss has been identified by the bank or by internal or external auditors or the RBI inspection. In loss assets realizable value of security available is less than 10% of balance outstanding/ dues.

b. Strategies and Processes:

The bank has a well defined Loan Policy & Investment Policy covering the important areas of credit risk management as under:

- Exposure ceilings to different sectors of the economy, different types of borrowers and their group and industry
- Fair Practice Code in dispensation of credit
- Discretionary Lending Powers for different levels of authority of the bank
- Processes involved in dispensation of credit – pre-sanction inspection, rejection, appraisal, sanction, documentation, monitoring, and recovery.
- Fixation of pricing.

c. The Credit Risk philosophy, architecture and systems of the bank are as under:

Credit Risk Philosophy:

- To optimize the risk and return envisaged in order to see that the Economic Value Addition to Shareholders is maximized and the interests of all the stakeholders are protected alongside ensuring corporate growth and prosperity with safety of bank's resources.
- To regulate and streamline the financial resources of the bank in an orderly manner to enable the various channels to incline and achieve the common goal and objectives of the Bank.
- To comply with the national priorities in the matter of deployment of institutional finance to facilitate achieving planned growth in various productive sectors of the economy.
- To instill a sense of credit culture enterprise-wide and to assist the operating staff.
- To provide need-based and timely availability of credit to various borrower segments.
- To strengthen the credit management skills namely pre-sanction, post-sanction monitoring, supervision and follow-up measures so as to promote a healthy credit culture and maintain quality credit portfolio in the bank.
- To deal with credit proposals more effectively with quality assessment, speedy delivery, in full compliance with extant guidelines.
- To comply with various regulatory requirements, more particularly on Exposure norms, Priority Sector norms, Income Recognition and Asset Classification guidelines, Capital Adequacy, Credit Risk Management guidelines etc. of RBI/other Authorities.

Architecture and Systems of the Bank:

- A Sub-Committee of Directors has been constituted by the Board to specifically oversee and co-ordinate Risk Management functions in the bank.
- Credit Policy Committee has been set up to formulate and implement various credit risk strategy including lending policies and to monitor Bank's Enterprise-wide Risk Management function on a regular basis.
- Formulating policies on standards for credit proposals, financial covenants, rating standards and benchmarks.
- Credit Risk Management cells deal with identification, measurement, monitoring and controlling credit risk within the prescribed limits.
- Enforcement and compliance of the risk parameters and prudential limits set by the Board/regulator etc.,
- Laying down risk assessment systems, developing MIS, monitoring quality of loan portfolio, identification of problems and correction of deficiencies.
- Evaluation of Portfolio, conducting comprehensive studies on economy, industry, test the resilience on the loan portfolio etc.,
- Improving credit delivery system upon full compliance of laid down norms and guidelines.

d. The Scope and Nature of Risk Reporting and / or Measurement System:

The Bank has in place a robust credit risk rating system for its credit exposures. An effective way to mitigate credit risks is to identify potential risks in a particular asset, maintain a healthy asset quality and at the same time impart flexibility in pricing assets to meet the required risk-return parameters as per the bank's overall strategy and credit policy.

The bank's robust credit risk rating system is based on internationally adopted frameworks and global best practices and assists the bank in determining the Probability of Default and the severity of default, among its loan assets and thus allow the bank to build systems and initiate measures to maintain its asset quality.

V. Credit risk: Disclosures for portfolios subject to the standardised approach

Under Standardized Approach the bank accepts rating of all RBI approved ECAI (External Credit Assessment Institution) namely CARE, CRISIL, Fitch (India), and ICRA for domestic credit exposures. For overseas credit exposures the bank accepts rating of Standard & Poor, Moody's and Fitch.

The bank encourages Corporate and Public Sector Entity (PSE) borrowers to solicit credit ratings from ECAI and has used these ratings for calculating risk weighted assets wherever such ratings are available.

The exposure amounts after risk mitigation subject to Standardized Approach (rated and unrated) in the following three major risk buckets are as under:

Category of Risk Weight	Outstanding Exposure (Amount in Cr.)
Below 100 % risk weight	118901.00
100 % risk weight	91742.55
More than 100 % risk weight	6302.08
Total CRM Deducted	13382.16
Total Exposure	230327.79

VI. Credit risk mitigation:

a. Bank obtains various types of securities (which may also be termed as collaterals) to secure the exposures (Fund based as well as Non-Fund based) on its borrowers. Bank has adopted reduction of exposure in respect of certain credit risk mitigant, as per RBI guidelines. Wherever corporate guarantee is available as credit risk mitigant, the credit risk is transferred to the guarantor to the extent of guarantee available. Generally following types of securities (whether as primary securities or collateral securities) are taken:

1. Moveable assets like stocks, moveable machinery etc.
2. Immoveable assets like land, building, plant & machinery.
3. Shares as per approved list
4. Bank's own deposits
5. NSCs, KVPs, LIC policies, Securities issued by Central & State Governments etc.
6. Debt securities - rated by approved credit rating agency- with certain conditions
7. Debt securities- not rated- issued by a bank- with certain conditions
8. Units of Mutual funds
9. Cash Margin against Non-fund based facilities
10. Gold and Gold Jewelry.

The bank has well-laid out policy on valuation of securities charged to the bank.

The securities mentioned at Sr. No. 4 to 10 above are recognized as Credit Risk Mitigants for on-balance sheet netting under Basel-II standardized approach for credit risk.

The main types of guarantors against the credit risk of the bank are:

- ▶ Individuals (Personal guarantees)
- ▶ Corporates
- ▶ Central Government
- ▶ State Government
- ▶ ECGC
- ▶ CGTMSE

CRM collaterals available in Loans Against Bank's Own Deposit and Loans against Government Securities, LIC Policies constitute a major percentile of total CRM.

CRM securities are also taken in non fund based facilities like Guarantees and Letters of Credit.

Eligible guarantors (as per Basel-II) available as CRM in respect of Bank's exposures are mainly Central/ State Government, ECGC, CGTSE, Banks & Primary Dealers with a lower risk weight than the counter party AND other entities (mainly parent, subsidiary and affiliate companies) rated AA(-) or better.

Total	79.68	79.68	100	79.68

d. An amount of Rs.20.58cr has been deducted from each of Tier I and Tier II capital as 50% of credit enhancement.

e. The bank does not presently plan to securitise any of its standard assets during the year 2010-11.

VIII. Market risk in trading book

The Bank defines market risk as potential loss that the Bank may incur due to adverse developments in market prices. The following risks are identified as Market risk:

- Interest Rate Risk
- Currency Risk
- Price risk

To manage risk, Bank’s Board has laid down various limits such as Aggregate Settlement limits, Stop loss limits and Value at Risk limits. The risk limits help to check the risks arising from open market positions. The stop loss limit takes in to account realized and unrealized losses.

Bank has put in place a proper system for calculating capital charge on Market Risk on Trading Portfolio as per RBI Guidelines, viz., Standardised Duration Approach. The capital charge thus calculated is converted into Risk Weighted Assets. The aggregated Risk Weighted Assets for credit risk, market risk and operational risk are taken in to consideration for calculating the Bank's CRAR under Basel-II.

Risk Weighted Assets and Capital Charge on Market Risk (as per Standardised Duration Approach) as on 30th Sept 2010 are as under:

(Rs. in Crore)

	RWAs	Capital Charge
Interest Rate Risk	6331.65	569.85
Equity Position Risk	4042.52	363.83
Foreign Exchange Risk	225.00	20.25
Total Capital Charge	10599.17	953.93

IX. Operational risk

In line with RBI guidelines, Bank has adopted the Basic Indicator Approach to compute the capital requirements for Operational Risk. Under Basic Indicator Approach, average income of last 3 years is taken into consideration for arriving at Risk Weighted Asset.

X . Interest rate risk in the banking book (IRRBB)

a. The interest rate risk is measured and monitored through two approaches:

(i) Earning at Risk (Traditional Gap Analysis) (Short Term):

The immediate impact of the changes in the interest rates on net interest income of the bank is analysed under this approach.

The Earning at Risk is analysed under different scenarios:

1. Yield curve risk: A parallel shift of 1% is assumed for assets as well as liabilities.
2. Bucket wise different yield changes are assumed for the assets and the same are applied to the liabilities as well.
3. Basis risk and embedded option risk are assumed as per historical trend.

(ii) Economic Value of Equity (Duration Gap Analysis) (Long term)

It is done by calculating modified duration of assets and the liabilities to finally arrive at the modified duration of equity.

- This approach assumes parallel shift in the yield curve for a given change in the yield.
- Impact on the Economic Value of Equity is also analysed for a 200 bps rate shock as indicated by RBI.
- Market linked yields for respective maturities are used in the calculation of the modified duration.

The analysis of bank's Interest Rate Risk in Banking Book (IRRBB) is done for both the domestic as well as overseas operations. The Economic value of equity for domestic operations is measured and monitored on a quarterly basis.

b. The net impact on Net Interest Income (NII) of the bank against 100 bps change in interest rates is Rs. 48.64 Crore in the Domestic Operations (Rupee resources and deployment) and Rs. 47.81 Crore in International Operations.
